

Mohammed Rafi Shaik — AI/ML

Engineer Portfolio

A single-page portfolio site built with plain HTML, CSS and JavaScript (no frameworks, no build step).

Files

- `index.html` — page structure/content
- `style.css` — design system + styling
- `script.js` — nav toggle, scroll reveal, animated network background
- `assets/Mohammed_Rafi_Shaik_CV.pdf` — downloadable CV
- `assets/cert1-1.png` , `assets/cert2-1.png` — certificate images
- `assets/profile.jpg` — **add your own photo here** (see note below)

Adding your photo

No photo file was included in the upload, so the About section currently

shows your initials ("MRS") as a placeholder. Drop a photo named

`profile.jpg` into the `assets/` folder (square image, at least 500x500px)

works best) and it will appear automatically — no code changes needed.

Running locally

Just open `index.html` in a browser. No server or build tools required.

Publishing for free with GitHub Pages

See the step-by-step guide in the chat response.
